

## About Learning Facilities & Teaching Arrangements

Item	Mean	Std Dev
1. The learning facilities and systems (e.g. AVIT, LMS) provided by PolyU are adequate to support my study in this subject.	4.7	0.5
2. The teaching arrangements for the subject provided me with an appropriate learning experience.	4.7	0.6
3. There are adequate opportunities to interact with the teaching staff for this subject.	4.9	0.2
4. Overall, I am satisfied with the teaching arrangements this semester.	4.8	0.5

5=Strongly agree; 4=Agree; 3=No strong view; 2=Disagree; 1=Strongly disagree

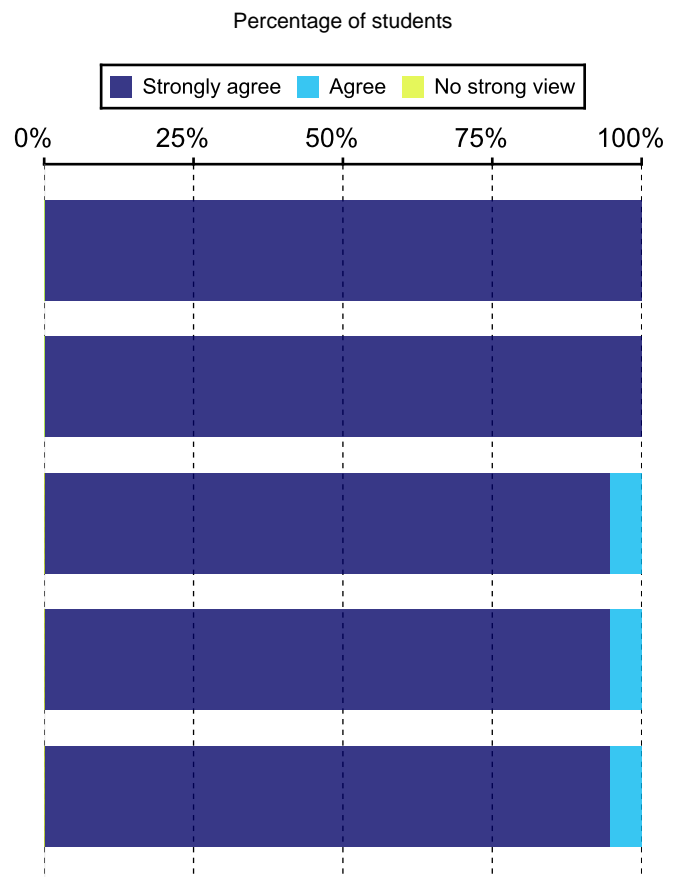

## ABOUT THE STAFF MEMBER

### Teaching of the Staff Member

Item	Mean	Std Dev
1. The staff member was well prepared for class.	5.0	0.0
2. The staff member encouraged students to think about the material in a critical manner.	5.0	0.0
3. In this subject, I was encouraged to find information on my own and learn independently.	4.9	0.2
4. The staff member encouraged students to ask questions and discuss ideas in class.	4.9	0.2
5. The staff member gave useful feedback on my work.	4.9	0.2

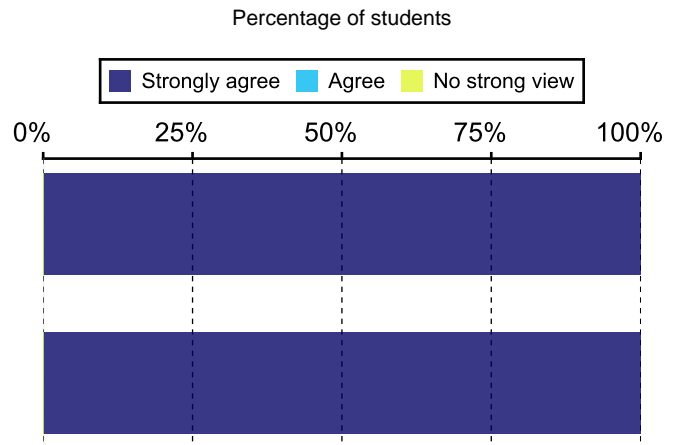

5=Strongly agree; 4=Agree; 3=No strong view; 2=Disagree; 1=Strongly disagree

### Overall View About the Teaching of the Staff Member

Item	Mean	Std Dev
1. The teaching of the staff member has provided me with a valuable learning experience.	5.0	0.0
2. Overall, I think that the staff member is an effective teacher.	5.0	0.0
<b>Grand mean of items on Overall View</b>	<b>5.0</b>	<b>0.0</b>

5=Strongly agree; 4=Agree; 3=No strong view; 2=Disagree; 1=Strongly disagree

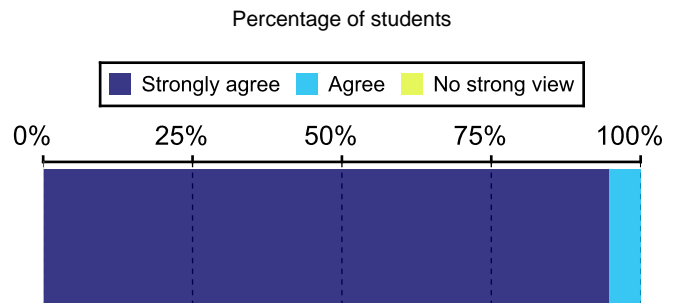

### 1. Extent of staff member using English in his/her classroom teaching

	Distribution
All or nearly all of the time	100.0%
Majority of the time	0.0%
About half or less than half of the time	0.0%
Missing	0.0%

Item	Mean	Std Dev
2. The staff member's spoken English was easy to understand.	4.9	0.2

5=Strongly agree; 4=Agree; 3=No strong view; 2=Disagree; 1=Strongly disagree

Note: The responses from students were captured during the COVID-19 pandemic.

## OPEN-ENDED COMMENTS ON THE SUBJECT

Note: Each bullet point denotes a response from an individual student.

### 1 What aspects of the subject were most useful to your learning?

- stata
- Stata is very useful for my learning.
- Very useful class. Professor use prossive process and I learn material clearly. Very helpful.
- In the whole semester, I think practical homework is the most helpful to me. Because of that replication, I quickly had a deeper understanding of the research methods of the thesis and applied them to practical research
- How to use stata andhow to do research from data collection
- stata use
- the method of analysis
- I learned how to use stata, how to do a research paper and give the presentation. The research method such as DID is very useful.
- This is the most valuable and greatest University lecture I have ever learned. In this class, the knowledge related to scientific methodology in the economy is so precise and systemic that can hardly learn from anywhere else. Besides, Dr. Yip is so kind, warmhearted and hard-working professor. He not only takes care of our learning performance but also tries very hard in caring for our mental health. So, I am so glad and feeling honored I could participate in this lecture and my whole academic life benefited from that.
- the application of stata of eco article replication really help me go through the research method knowledge and understand more about research experience.
- everything
- The subject provides very clear theoretical background for analysis of China's business environment. It also combines the theory and reality, which helps us to have a better and deeper understanding of China' market.
- Research Method and Stata

### 2 How could the subject be improved to help you learn better?

- It helps me to use quantitive method to analyze economic relationships
- better understanding research method
- I strongly suggest the university keep open this lecture and made more students have chance to demonstrate their own contributions to the academic articles. Without this lecture, it would be very hard for an ordinary student to learn academic writing and waste their best age in life.
- I think the subject is pefect setted.
- Teachers can teach more practical statA usage skills. If there's a chance to go offline later
- Add more Stata showing class and some videos maybe helpful
- I recommend the teaching mode of subject should be arranged offline. And the learning facilities (computers) in classroom don't have the teaching software (stata) this subject required, and I think it could be improved.
- it helps me better understand the theory and method (especially DID method), which can be used in my future research directly.
- The linitation of online session for the last half semiser. In-person lecture will be more helpful
- maybe the percentage of final exam can be decreased, and divided into other projects

## OPEN-ENDED COMMENTS ON THE STAFF MEMBER

Note: Each bullet point denotes a response from an individual student.

1 What aspects of this staff member's teaching were most helpful to your learning?

- Give examples that are easy to understand.
- The content in the lecture is very straightforward and understandable.  
With the patience of our teacher, I can have clearer understanding of the content.  
The teacher is also very accommodating, which facilitates our communication  
The feedback is timely and detailed.
- Prof. YIP explained abstract statistics in an easy and efficient way , really care about students' learning process and outcome and willing to provide help.
- teaching methodology
- Chi Man is my favorite professor so far. To be honest, it's easy to get sleepy in class at 8:00 a.m., but I can always concentrate on his class. At the beginning of the semester, I thought the content of this course was a little difficult, and I was worried about whether I could learn it well. Fortunately, Chi Man taught really carefully in the class. He explained every knowledge point clearly. When we have questions, he always answers them patiently. I used to be a person who was shy about asking questions in class, but now I am willing to ask questions when I feel confused, which helped me to understand the course content better. In addition, I think this course is really useful, especially for me to learn how to do research paper. In my opinion, Chi Man is not only our professor but also our friend.
- The lecture style of this professor is very smooth and easily understand. He will let us replicate the results to solidify the learning outcome. And he will repeat endless times with patients for the part that students do not understand. Besides, he also cares about our mental health and releases our stress. Anyway, he is the best teacher that I have ever met. It is my honor to have his class.
- skills of stata !
- During class, the teacher can effectively communicate with the students and reply in time to ensure that every student can understand and learn knowledge.
- He is good at encouraging students to ask questions and possess the ability to make complex points easier for students to comprehend via providing numerous examples in real live. And he did a great job in arranging reasonable and useful assignments, tests, and group works for students to help us develop practical skills. I would say, he is the best teacher I have ever met in Polyu.
- The practice question and paper repreasentation help student to have deep understanding of concept in real case.
- Professor Yip is very nice and willing to answer the questions. Especially in the process of preparation of our presentation, professor Yip helped us a lot and asked us feel free to ask him any questions. Professor Yip is a very responsible teacher and I strongly recommend the subject of professor Yip.
- If we have any question, we can ask and discuss in time.

2 How would you like the teaching be changed (if at all), to help you learn better in the subject?

- There can be more little prattice after each class and help understand
- It's the best teacher I've ever met
- I think the teacher can teach more practical statA usage skills. If there's a chance to go offline later
- He is OK for now. I trust his performance.
- keep the same teaching style
