Really good
By far one of the best I teachers I have ever had. I genuinely enjoyed coming to this class and the professor made learning the material super easy and tried his best to help us.
Chi Man always takes the time to make sure that all his students understand each concept. He uses multiple examples to make concepts clear and takes the time to connect with his students.
I thought that chi man was a great Instructor and provided a lot of help for me to succeed in his class.
I answered somewhat agree on the box that asked "provided feedback that supports my learning" because I have not asked for feedback from the professor. This is because I've only been to his office once and haven't asked for further help. Other than that Chi Man is a good professor who takes the time to make sure he explains everything well.
He is a really good teacher. If any students don't understand something, he always find a lot of way to explain it.
The economics lab needs to properly communicate with the economics professors as to what is expected on online tests and materials they're teaching, it has happened many times where the lab has expected things on the tests or changed the way tests are formatted without telling the professor or the students, it has caused a lot of problems multiple times

I didn't enjoy the Maple Take Home Tests. The lab people did not seem to know what we were learning and didn't seem to be helpful. Chi Man was the best teacher ive ever had.

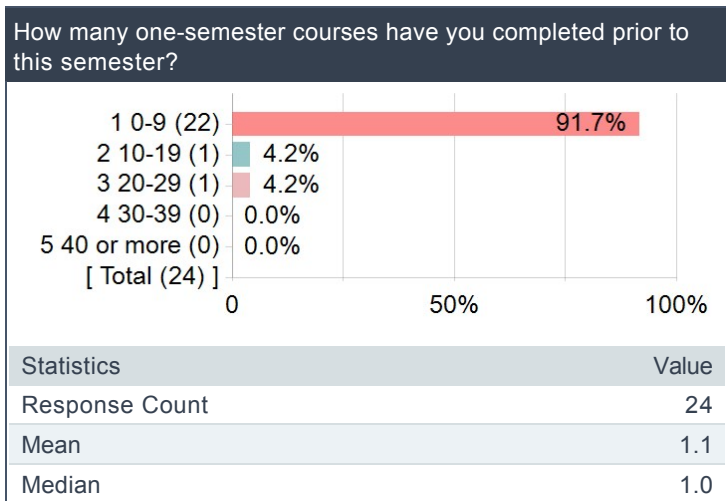

The lab is not helpful, they are unreasonable and not helpful. The exams they create were not in relation to content. The instructor was aware and tried to help.
